**ECONOMY IN SOUTH AFRICA :**

South Africa is the economic powerhouse of Africa with a gross domestic product (GDP) four times that of its southern African neighbors and comprising around 25% of the GDP of Africa. The country leads the continent in industrial output (40% of total output) and mineral production (45%) and generates most of Africa's electricity (over 50%). Its major strengths include its physical and economic infrastructure, natural mineral and metal resources, a growing manufacturing sector, and strong growth potential in the tourism, higher value-added manufacturing and service industries.

**THE TEXTILE / CLOTHING INDUSTRY :**

South Africa has a robust clothing industry. Clothing sales in SA are dominated by a number of retail houses, each with three or four store brands and each brand represented by a chain of over 100 stores within SA alone. The top seven chains account for roughly 70% of domestic market share. Some of the brands are also expanding into the rest of Africa.
